## Ethyol® Contract Extension

Oncology Associates' agreement with MedImmune Oncology has been extended, effective **November 1, 2004**. The agreement provides discounted pricing for the product Ethyol®, a selective cytoprotective agent used to reduce toxicities associated with certain cancer chemotherapy and radiotherapy.

Ethyol® is indicated for the reduction of cumulative renal toxicity associated with repeated administration of cisplatin in patients with advanced ovarian cancer or non-small cell lung cancer (NSCLC). Ethyol® is also indicated to reduce the incidence of moderate to severe xerostomia (chronic dry mouth) in patients undergoing post-operative radiation treatment for head and neck cancer, where the radiation port includes a substantial portion of the parotid glands.

Ethyol® is available in 500 mg/10mL vials.

For more information on the Ethyol® agreement, please contact Oncology Associates at **888-732-7352** or visit [www.ethyol.com](http://www.ethyol.com) to learn more about Ethyol®.
