

Reimbursement of OA Contracted Products

A Quick Reference Guide for OA Members

To alleviate any confusion early in 2004, we have compiled a brief summary of OA contracted products and the appropriate billing codes associated with each product. The following tables provide useful billing and reimbursement information, including NDC numbers, HCPCS Codes and Billing Unit.

As of January 1, 2004 the Medicare Part B allowable for most drugs administered in the physician office changes from 95% of the Average Wholesale Price (AWP) to 85% (with a possible range of

80-87%) of a reference AWP (the AWP of April 1, 2003). Medicare pays 80% of the allowable amount; the patient, or the patient's secondary or supplemental insurance, pays the remaining 20%.

Please be aware the following information should only be used as a reference and not as the ultimate source of guidance when filing an insurance claim. Please refer to your local Medicare or CMS web site for the most up to date 2004 reimbursement rates and changes as they occur.
