### Guidelines for Using Modifiers:

- When billing for E&M codes in the office setting, use **Modifier 25** when additional services such as chemotherapy, supportive drug administration, bone marrow aspiration, or biopsy are performed. This modifier indicates it is a separate, identifiable service and will go payable by Medicare.
- Use **Modifier 59** when billing for hydration with codes G0345 and G0346. **PLEASE NOTE:** When billing for hydration services, the hydration must occur prior to and/or subsequent to administration of chemotherapy and must require a minimum of 30 minutes to administer to bill for these activities. Hydration provided to facilitate drug delivery is not separately reportable.
