Current CEU's, CME's and continuing education opportunities

## CE's from Novartis Oncology and Amgen

The following online continuing education activities are all available online at [www.oesweb.com](http://www.oesweb.com).

### CANCER TREATMENT INDUCED DIARRHEA: Interventions to Minimize the Roller Coaster Ride

Register online at: [www.oesweb.com](http://www.oesweb.com)

Register by fax: 412-859-6167

Expiration Date: July 30, 2006

This monograph is intended for oncology nurses and health care professionals interested in learning about the management of cancer-treatment induced diarrhea.

**Learning Objectives:** After reading this monograph, participants will be able to: Identify the manifestations of cancer treatment-induced diarrhea; Identify medical treatment options; Discuss novel nutritional interventions; Discuss nursing strategies to minimize cancer treatment-induced diarrhea.

**Accreditation:** This educational activity has been approved for **1.8 contact hours** by the Oncology Nursing Society (ONS) Approver Unit. The American Nurses Credentialing Center's Commission on Accreditation accredits ONS as an approver of continuing education. This independent study meets ONS guidelines for quality educational content. ONS endorsement does not constitute medical advice. Healthcare professionals should exercise their own independent judgment.

This program was planned and produced by Oncology Education Services, Inc. (OES), through an unrestricted educational grant from Novartis Oncology.
