ETHYOL® CONTRACT EXTENSION

Oncology Associates' agreement with MedImmune Oncology has been extended, effective January 1, 2006. The agreement will run until June 30, 2006 and provides discounted pricing for the product Ethyol®, a selective cytoprotective agent used to reduce toxicities associated with certain cancer chemotherapy and radiotherapy.

Ethyol® is indicated for the reduction of cumulative renal toxicity associated with repeated administration of cisplatin in patients with advanced ovarian cancer or non-small cell lung cancer (NSCLC). Ethyol® is also indicated to reduce the incidence of moderate to severe xerostomia (chronic dry mouth) in patients undergoing post-operative radiation treatment for head and neck cancer, where the radiation port includes a substantial portion of the parotid glands. Ethyol® is available in 500 mg/10mL vials. For more information on the Ethyol® agreement, please contact Oncology Associates at **888-732-7352** or visit **www.ethyol.com** to learn more about Ethyol®.
