

# OA Annual Physician Member Conference

August 3-5, 2007 | Baltimore, MD

## Baltimore Bound

The Baltimore Inner Harbor area provided a vibrant backdrop for the 2007 OA Annual Physician Member Conference. OA Members gathered for an ASCO review of topics ranging from advances in myelodysplastic syndromes to treatment of advanced non-small cell lung cancer. Other presentations included colorectal cancer therapies, a pipeline drug presentation and reimbursement provider programs.

Throughout the weekend-long conference, members had the opportunity to network with each other, OA staff and sponsors. Members also took advantage of this charming east coast city by visiting the National Aquarium and its many museums and restaurants.

Oncology Associates would like to thank the following sponsors for supporting this conference:
